Idaho Comprehensive Cancer Control Program

Cancer is the
2nd 
leading cause of death
in the U.S.

Cancer is the
leading 
cause of death in
Idaho since 2008.

In Idaho, 
approximately
22%
of all deaths each year
are from cancer.

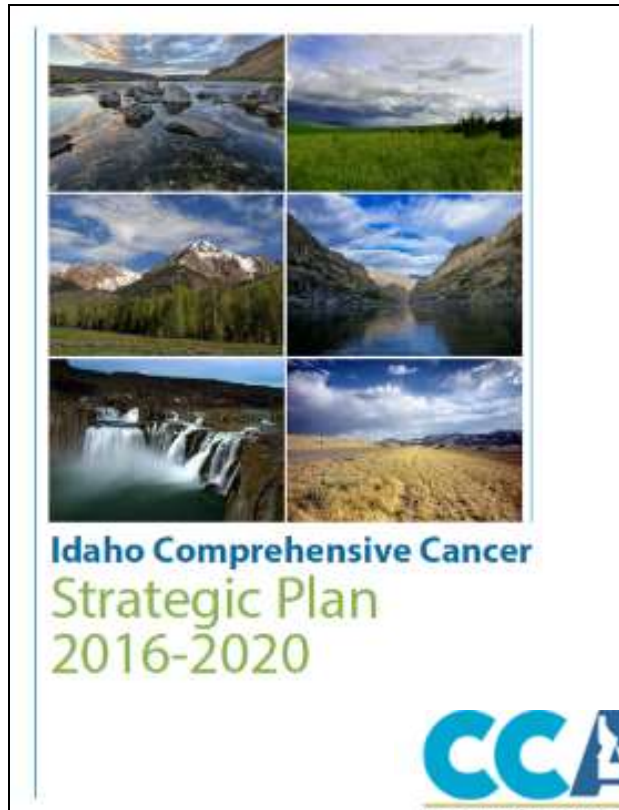

Each year, there are
approximately
8,000 
new cases of cancer
(invasive and in situ)
and
2,700 
cancer deaths.

- Reduce cancer risk
- Find cancers earlier
- Improve treatments
- Increase the number of people who survive cancer
- Improve quality of life for cancer survivors
